SUMMARY

Python developer and automation engineer who builds full-stack products fast using AI coding agents (Claude, ChatGPT, Cursor, Antigravity). Experienced across FastAPI backends, PostgreSQL schemas, REST APIs, and JavaScript frontends, with a track record of shipping working end-to-end systems rather than prototypes. Comfortable with sprint-based delivery and independent execution.

SKILLS

Programming: Python, JavaScript, SQL

AI Coding Agents: Claude, ChatGPT, Cursor, Antigravity

Backend & APIs: FastAPI, Flask, REST APIs, JWT Auth, AsyncIO

Databases: PostgreSQL, MySQL, schema design

Frontend & Platforms: Vanilla JS, Chrome Extensions, Telegram API, Git/GitHub

Automation: Desktop Automation, Browser Automation, Real-Time Event Processing

PROJECTS

Trading Journal Web App | Python, JavaScript, REST API

- Built a full-stack web app with a Python backend and JavaScript frontend, using Claude, ChatGPT, and Cursor to accelerate development.
- Implemented REST API endpoints with full CRUD support and a calendar-based P&L view with CSV/PDF export.
- Maintained clean separation between frontend and backend layers for maintainability and fast iteration.

Digital Election System | FastAPI, PostgreSQL, JWT Auth

- Designed a secure backend with 4-tier role-based access control and a normalized PostgreSQL schema.
- Delivered 6 production-ready modules covering registration, admin review, escalation, and audit export.

Trading Signal Automation Tool | Python, JavaScript, Chrome Extension

- Engineered a Chrome extension that captures live data and streams it to a Python backend in real time.
- Designed a modular architecture linking the browser extension, Python server, and desktop automation layer.
- Automated end-to-end platform actions from signal detection to execution with zero manual intervention.

Automated News Alert Router | Python, Telegram API, AsyncIO

- Built an async Python bot that monitors high-frequency streams and routes alerts by configurable rules.

EXPERIENCE

Creative Lead | Mulearn TLY, Thalassery | Jun 2024 – Jul 2025

- Designed event posters and social graphics in Figma for 6–10 community tech events over 13 months.
- Managed creative output independently while coordinating approvals with a senior lead, sharpening deadline management.

EDUCATION

B.Tech, Information Technology | College of Engineering Thalassery | 2023 – 2027

CERTIFICATIONS

- IBM – AI Developer Professional Certificate
- NVIDIA – AI Infrastructure & Operations Fundamentals
- University of Helsinki – Introduction to Artificial Intelligence
- HP LIFE – AI for Business Professionals
